PROFILE

My career lies at the intersection of **economics, sustainability, and technology**. With a degree in economics and over **4 years of experience in socioeconomic research**, I have contributed to **development projects in more than 25 cities**, impacting over 500,000 residents. Driven by curiosity about how human decisions shape societies, I have always been motivated to generate real impact.

This has led me to work on research **projects aligned with the UN Sustainable Development Goals (SDGs)** and to coordinate community-oriented sustainability initiatives. Inspired to amplify impact through technology, I developed web projects and began my studies in the world of programming.

My goal is to be in multicultural and collaborative environments. I have an analytical and strategic profile, but I also stand out for my **creativity, optimism, and persistent pursuit of generating impact**.

CORE COMPETENCIES

Research & Policy Analysis
· Socioeconomic research
· Regional development studies
· Policy analysis & indicator mapping
· Technical reporting & datasets

Sustainability & Impact
· SDG frameworks & mobilization
· ESG strategy alignment
